

ROOTED IN THE LANDSCAPE®

REVOLUTIONIZING AGRICULTURE, FROM THE

Travel the countrysides of 110 nations around the world, and you will find the Brock name. Our agricultural management solutions dot the terrain and have made an indelible mark on the industry.

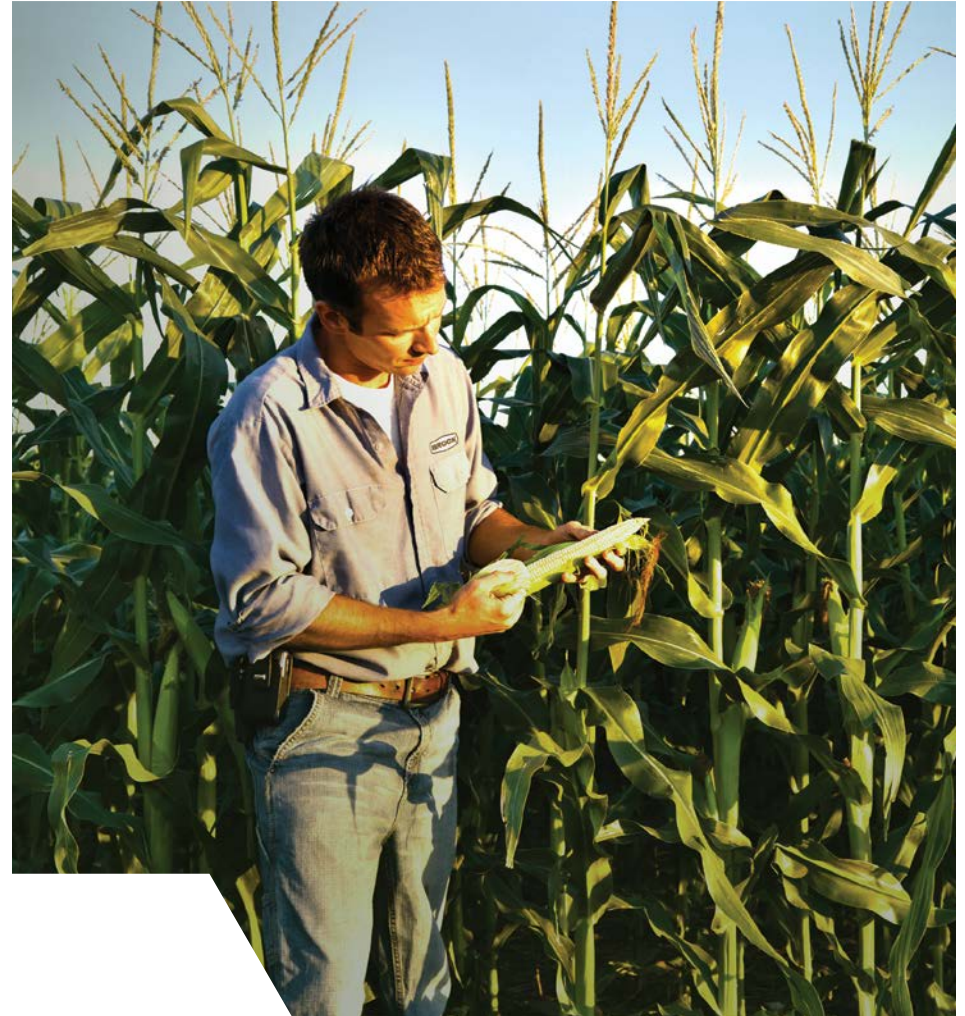

We know your business is more than a job – it is a calling. Your work shapes the landscape and brings life-enriching products to people around the world.

To safeguard the integrity of your yield and bridge the gap between harvest and market, you need a persistent ally behind the scenes. An ally that will actively partner with you to help deliver superior quality, so you can achieve improved profits. Our deep-seated agricultural heritage has given us the insights needed to understand the industry landscape – and to revolutionize it from the ground up. Brock innovations have enabled producers to do business more efficiently and profitably.

Today, Brock Grain Systems has a singular goal: to help you support the growth of your business by bringing the highest-quality products to market.

From expert support that is built on our independent dealer network to innovative systems that make your work easier, you can depend on Brock.

Brock Grain Systems. Rooted in the Landscape®.

GROUND UP

Brock Grain Systems is powered by innovation.

From our invention of innovative grain bin aeration flooring to industry-leading automated drying controls, to the recent development of our EVEREST® E-SERIES Grain Storage Bins, we have designed the most reliable and creative solutions available. And we continue our aim to address new and changing issues – often, before others even recognize those needs.

This proactive approach to technology and commerce has kept us at the forefront of the commercial agricultural industry. Our comprehensive knowledge of your business allows us to anticipate, plan for, and adapt to ever-shifting business requirements — starting with efficiently preparing your grain for storage, and protecting and preserving it until you are ready to take it to market.

Yet even with the changes that affect your business and the industry, your confidence in Brock will endure for years to come, because as we innovate, we design new features that frequently can also be integrated into existing systems. So you will have ongoing opportunities to take advantage of performance enhancements as you build your grain system.

It is all part of our commitment to help you work more efficiently and more profitably – and to help you to provide the best-quality product to your customers.

A GRAIN OF
TRUTH

2002

The year in which Brock
and its parent company,
CTB, Inc., were acquired by
Berkshire Hathaway Inc.

*"Ever since [Berkshire acquired
CTB, Inc.], the operational results,
the acquisitions that have been
made ... everything has exceeded
my expectations"*

— Warren Buffett,
CEO of Berkshire Hathaway Inc.

Wherever the Brock name appears, you know you can trust the product the name is on. Businesses that depend on Brock do so because of our proven results.

We bridge the gap between harvest and market, giving you the tools you need to get your valuable crop ready for sale. Our grain management systems help ensure that you are providing top-quality products to the marketplace while minimizing waste.

Brock is your partner at a critical stage in the grain supply chain, and we take our role seriously. That is why Brock dealers are highly trained to understand the specific requirements of your business and your products. Our experienced teams will back you with the support to safeguard your most important asset – from moisture control to storage, handling and conditioning.

This protection and preparation of your commercial products is essential to your way of life. Brock products and services help you to reduce risk, so you can keep your focus on grain production and marketing.

DEPENDABLE SUPPORT TO SUSTAIN YOUR BUSINESS FOR THE LONG TERM

At Brock, our top priority is to help you achieve success in your business. To do this, we have built a customer service structure that flows through every aspect of development, delivery, and ongoing support. Whether you are working directly with Brock designers on a custom solution, or seeking information on our existing systems, we are here to help.

Our strong, independent dealer network plays a vital role in bringing our products and services to you. With ongoing training on the Brock product line, plus expert knowledge of your industry, your dealer will help you find the solution that is best for your business. And, once you have made your choice, you can count on Brock for on-time delivery, thanks to proprietary IT systems we have created specifically to help ensure complete and error-free shipping – so you can get up and running as quickly as possible.

You also get ongoing assistance from your Brock dealer after your initial investment, as well as long-term strategic advice on technology upgrades, and more. In addition, our dealers communicate your insights and feedback to our design teams, who consider this valuable customer input when approaching new products and feature enhancements. So you can rest assured that we are listening to your requests.

Get the support you have been looking for, with Brock and its dealer network on your side.

A GRAIN OF
TRUTH

3-D

Brock engineering teams use advanced 3-D solid computer modeling, together with analysis software, to ensure absolute precision and top-notch performance in the systems we build. Each of our four, fully-staffed engineering teams is dedicated to specific design work in the areas of storage, handling, conditioning/ drying, and structures/support equipment.

SYSTEM SOLUTIONS

Brock Grain Systems was founded as Brock Manufacturing in 1957 to provide bulk feed and grain storage bins for the agricultural market. The business became a division of CTB, Inc. in 1976. CTB is a leading global designer, manufacturer and marketer of systems and solutions for the production of grain, poultry, pigs and eggs, as well as for various equestrian and industrial applications.

Over the years through both development and acquisition, Brock has expanded its product line to include new and innovative equipment and tools for its commercial customer base, including grain drying, handling and conditioning systems. For example, in 1997, CTB purchased the grain bin division of Butler Manufacturing, the company that pioneered the grain bin business in the early 1900s. CTB then acquired assets of Beard Industries, Inc., a leading grain dryer manufacturer in early 2002 and the assets of LeMar Industries and Riley Equipment, leading conveying and support structure manufacturers in 2012. Many BROCK® Systems are adaptable for industrial use as well, to serve the specialized needs of the plastics, oil and biofuel industries, among others.

Founded in 1952, CTB has been dedicated to "Leadership Through Innovation®" throughout its history. The company was acquired by Berkshire Hathaway Inc. in 2002. CTB operates from multiple locations in various countries around the world and serves its customers through a worldwide network of independent dealers and distributors. The company's Web address is www.ctbinc.com.
